

How to Choose a Carpet - Colour

Above all, the colour of your carpet is one of the most important decisions you will have to make in the selection process of your new floor.

Firstly, you will have to choose what you like, not the one that the presenter of the latest house makeover TV programme tells you to like. The wrong choice or a one that is forced upon you will never give you a satisfactory result.

Colour will also set the mood and atmosphere within the room:

- *Green is said to be the colour of life. It creates an environment where you can submerge your senses and recharge. Resoundingly diverse, green is always fresh and vivid leaving energies renewed and spirits harmonised.*
- *Blue is perfect for work, play or relaxing. Fun and sophisticated, cool blues are highly versatile allowing you to create your perfect space.*
- *Cream and beige are the ideal base to start from. They create a feeling of tranquillity, calm and silence, putting you in touch with nature yet with the cleanliness of modern life-styles.*
- *Gold and yellow give a mellow almost dreamy atmosphere whilst giving a warm welcoming feel.*
- *Terracotta gives a warm almost Mediterranean feel reminding you of urns and sunshine and those happy days of summer.*

Finally, we have the deep burgundy and reds which recreate the elegant Regency period which suits rooms of all sizes and age, remaining forever timeless.

By choosing well you can make your home the perfect environment for you and your family to live your lives.

Be creative, be inspired and be careful.
